

## Senior C# .NET Web Developer - Hybrid

---

Are you a talented and motivated software developer with a passion for crafting cutting-edge applications? HMS Software is seeking a dynamic team-player to join us as a Software Developer, specializing in web development using C#, React, and TypeScript. If you thrive in a fast-paced environment, possess a can-do attitude, and excel at solving complex problems independently, we want to hear from you!

HMS Software is the publisher of TimeControl, one of the world's leading publishers of project management and timesheet systems. Our clients include some of the most recognized organizations in the world including AMD, Andritz, CANAM, the US Government, the Quebec Government, Bruce Power, Reebok and EXFO. We are currently looking for a full-time senior level Web Developer to join our team both remotely and at our headquarters in Pointe-Claire, Quebec.

The ideal candidate would work within our team of developers to design and develop our commercial enterprise software and application programming interfaces, with a focus on integration with enterprise applications and expanding our mobile development.

### **Here's more about why you'd enjoy working on our team:**

- Competitive compensation
- Industry leading benefits
- Informal, make-it-happen work environment
- Incredibly talented, friendly, results-driven, team-oriented co-workers
- Simple hybrid schedule - our staff work one day in person at our offices and otherwise remotely

### **Successful candidates will have:**

- 6+ Years of experience in Web Application development
- C# development skills
- Strong React and Typescript skills
- Familiarity with modern web technologies (HTML5, SCSS, JavaScript, WebSockets, etc.).
- Proficiency with relational database systems development using SQL
- Le bilinguisme – français et anglais – constituerait un excellent atout

### **Additional interesting assets include:**

- Strong interpersonal skills and experience working with clients to assist with their design and rollout process
- ASP.NET Web API and/or RESTful services
- Angular 4+ experience
- Experience with DevExtreme
- Unit and Integration testing / TDD
- OAuth/OpenID connect experience
- Responsive design using Bootstrap, or other responsive tools.

**Ready to take on this exciting challenge?** Apply through LinkedIn, or send your resume and a cover letter highlighting your relevant experience and explaining why you're the perfect fit for this role to [dorothy.dixon@hms.ca](mailto:dorothy.dixon@hms.ca) and specify job posting "Senior Developer".
